Yarns dossier

What is an OCCGuarantee[®] yarn?

Our OCCGuarantee[®] yarns are made of 100% organic and regenerative cottons free from chemicals and toxins, and are spun exclusively in Portugal, Egypt, and Turkey by spinning manufacturers that we carefully select for their commitment to high quality and sustainable production processes.

These manufacturers are strategic partners who share our values and have signed a strict code of conduct **to ensure ethical and non-harmful production processes for both people and the planet**. Our entire portfolio of yarns is spun and delivered in the original natural colours of the different varieties of our Brazilian, Egyptian, and Turkish cottons, just as they naturally occur from the seed. **No dyes or additional harmful chemical processes are used, emulating the way cotton was cultivated and spun in ancient times.**

We offer our yarn portfolio in different natural shades, ranging from pure white to dark brown, including cream and green tones.

Our yarns are crafted using high-quality ecologic cotton sourced from three fair trade agricultural projects: our own Family Farming project in Brazil, and two pioneering and highly recognized projects – a biodynamic one in Egypt, Sekem, and another regenerative project in Turkey, Ege Organics.

All cottons are 100% organic and cultivated utilizing agroregenerative or biodynamic agricultural practices.

We offer a portfolio of 3 families of yarns

- OCCRegenerative[®] Brazilian Colorgrown cotton yarns
- OCCByodynamic[®] Egyptian Giza cotton yarns
- OCCRegenerative[®] Turkish Aegean cotton yarns

OCCRegenerative® Brazilian Colorgrown cotton yarns

(Ref. OCCR-BR-)

The OCCRegenerative® Brazilian cotton yarns are crafted from our Brazilian Naturally Colorgrown cotton, renowned for its ability to naturally produce fibres in a diverse range of hues. These include “Branco Aroeira” and “Branco Mocó” (offering **ecru and ivory shades**), “BRS Rubi” (exhibiting a **reddish-brown tones**), and “BRS Verde” (displaying a **subtle pale green**).

The collection of OCCRegenerative® Brazilian Colorgrown cotton yarns is the result of collaboration with our partner, **Spoerry 1866**. Within this collection, Spoerry 1866 has curated an extensive selection of **Ring/Combed, Open End, and Open End Slub yarns**, available in a variety of counts ranging from **Ne 12/1 to Ne 40/1**. By skilfully blending fibres from these Brazilian Colorgrown varieties with premium Turkish ecru organic cotton, Spoerry 1866 has crafted a diverse portfolio of high-quality yarns, boasting a **captivating palette of browns, greens, and Ivory natural tones**.

All the Colorgrown cotton utilized in the yarns is sourced from our Family Farming agroecological project in north-eastern Brazil. Here, we cultivate these ancient cotton varieties without chemicals, using exclusively 100% organic and regenerative agricultural practices.

Furthermore, Spoerry 1866 is responsible for spinning the yarns we use to craft **our OCCGuarante® Brazilian Colorgrown cotton fabrics**. These yarns are crafted by blending **only our varieties of Brazilian ecru and colorgrown cottons**, ensuring the utmost quality and sustainability throughout our production process.

All OCCR-BR Yarns are designed, spun and comercialized by Spoerry 1866 and hold OCS Certification (Organic Content Standard)

OCCBiodynamic®

Egyptian Gizza cotton yarns

(Ref. OCCB-EG-)

Yarns made from **Egyptian Pima cotton of different Giza varieties, the finest cotton in the world, with silky and extra-long staple fibres.** Available in cream shades (from the Giza 90 variety) or natural white shades (from the Giza 92 variety).

We source our Egyptian cotton only from SEKEM, "the miracle of the desert", a holistic sustainable development project in Egypt that has transformed over 2,500 hectares of desert land into fertile soil using 100% organic and regenerative biodynamic agricultural practices

With these cotton varieties, we offer yarns in **natural cream tones** and in the **purest natural white**, without the need for highly polluting and toxic bleaching chemical processes. **We offer Compact&Combed, Combed, and Carded yarns. with counts ranging from Ne 14/1 to the finest Ne 120/2.**

Upon request, we can produce any kind of yarns, with different spinning techniques and counts, from Egyptian cotton of the varieties Giza 45, 86, 87, 88, 90, 92, 94, and 85.

All OCCB-EG yarns hold Demeter, Economy of Love, Fair trade and GOTS certifications

OCCRegenerative® Turkish Aegean cotton yarns

(Ref. OCCR-TK-)

Yarns made from **Turkish Aegean cotton**, considered one of the best varieties of Upland cotton in the world due to its long staple fibres, natural shine, and softness, high homogeneity, and bonding with minimal yellowing.

We source our 100% organic and regenerative Aegean cotton only from EGE ORGANIC, a pioneering family-owned agricultural company in Turkey specializing in the production of **certified 100% organic cotton**. We now support their new **cotton Carbon Farming project**, a regenerative initiative that enhances the **CO2 capture process in agricultural practices** to mitigate climate change.

We offer a portfolio of compact&combed yarns of counts Ne 30/1 and Ne 40/1, and Open End yarn of count Ne 20/1

On demand, we can craft other Combed and Open End yarn counts.
