

Finest 100% organic and regenerative cotton textiles for a better world

Suppliers of 100% organic and regenerative cotton
yarns, fabrics and garments since 1992.

Our company

Who we are: pioneers in Colorgrown cotton and undyed textiles

Back in 1992, we were **pioneers in creating our own yarns, fabrics, and garments** made from **100% organic Colorgrown Cotton**. These ancient cotton varieties naturally grow in cream, green, brown, and reddish shades, allowing us to craft **colorful undyed fabrics and garments**. Made of pure organic cotton free from harmful chemicals, our textiles are **exceptionally soft on the skin and fully environmentally respectful**.

How we do it: We maintain full ownership and purity of the cotton throughout the entire supply chain.

Since our inception, the **full traceability and maximum cotton purity in our textiles** has been at the heart of our business model. Therefore, we chose to have the **ownership of the raw materials at every step of the supply chain**.

We select and source our cotton from only **three agroecological projects** that are truly 100% organic, socially and economically sustainable, and respectful of the environment and local farming communities. These projects include **our own Family Farming project in Brazil**, where we source **Colorgrown cotton**, as well as two sustainable agroecological projects—one in Egypt, where we source **Giza cotton**, and another in Turkey, where we source **Aegean cotton**.

Then we spin our cottons to create **our OCCGuarantee® yarns**, which we use to knit and weave **our OCCGuarantee® fabrics**. These fabrics are then used to create our **OCCGuarantee® garments**.

Our basic line of yarns, fabrics, and garments is **always undyed and free from harmful chemicals**, respecting the **natural beauty of the colours** of our different cotton varieties and achieving **exceptional softness and comfort for the skin**.

Our company

OCCGuarante[®] From seed to Garment

We created our own seal, OCCGuarante[®], as a way to express how we like to work to achieve this purity and quality, sourcing our own cotton and transforming it into yarns, fabrics, and garments by collaborating only with top-quality manufacturers in Portugal, Spain, Egypt and Turkey ensuring the production of the purest textiles, from seed to garment.

Why we do it: We aim to generate a positive impact.

In the search for the purest cotton and fabrics, we recognized the urgent need to transform the conventional cotton industry—one of the most polluting, unsustainable, and socioeconomically unfair industries on our planet.

- Our aim is to generate a positive impact on both people and the environment.
- We believe we can achieve this by promoting the cultivation of 100% Organic Cotton using regenerative or biodynamic agricultural techniques.
- We work with suppliers and customers who share our vision and commitment to using sustainable and ethical products and processes.

Our cottons

We grow the world we want. We source only from ecological cotton cultivation projects that contribute to both people and the planet.

OCCRegenerative® Brazilian Colorgrown cotton

Since 2013, cotton from **our own Family Farming agro ecological project**, which provides economic security to over 200 families of small farmers in north-eastern **Brazil**.

We organically and regeneratively cultivate various local varieties of **Naturally Colorgrown Cotton from the seed**, millennia-old varieties of Brazilian cotton that naturally grow in cream, green, brown and reddish tones.

OCCBiodynamic® Egyptian Giza cotton

Cotton from **SEKEM, a holistic sustainable project** in **Egypt** that has transformed over 2,500 hectares of desert land into fertile soil using biodynamic agricultural practices

We source **Pima Egyptian cotton from Giza varieties**, considered the world's best cotton due to its extra-long staples and its natural whiteness, sheen and silkiness.

OCCRegenerative® Turkish Aegean cotton

Cotton from **EGE ORGANIC**, a family-owned company **pioneer in Turkey** in the production of certified 100% organic cotton and in certified regenerative practices that enhance soil quality and CO2 sequestration.

We source **Aegean Turkish cotton**, considered one of the best Upland cottons in the world for the length of its fibers, its softness, high uniformity, and minimal yellowing.

Our products and services

OCCGuarante CottonYarns

All our Yarns are made from our 3 cotton origins, free from chemical and toxins, offered undyed respecting the beauty of their natural colours:

OCCRegenerative® Brazilian Colorgrown cotton Yarns (Ref. OCCR-BR-)

- Up to 6 natural green and brown colours
- Ring/Combed to Open End, count from Ne 12/1 to Ne 40/1

Our products and services

Fabrics, Custom Projects

Using our OCCGuarantee® yarns, we can reproduce any knit or woven fabric based on a physical sample or technical specifications.

Any custom fabric project can be offered undyed, but also Dyed or Printed

Dyeing Process

We can dye any fabric with GOTS certified inks based on a Pantone TPX or TCX shade.

Printing process

We print any fabric according to the provided design using GOTS certified dyes. We offer two types of printing services:

- All-over Screen Printing
- Digital All-over Printing

Garment Manufacturing Services

At Organic Cotton Colours we have been creating all kind of garments for more than 30 years with our OCCGuarantee® fabrics, always under ethical and environmentally friendly production criteria.

Our production process is carried out in Portugal, through selected garment and apparel manufacturers that guarantee high quality European production standards.

We have our own team of Project Managers located in Portugal to supervise on site the full production process.

Our services include:

- Tech pack supervision
- Prototyping
- Size scaling
- On site manufacturing supervision
- Quality control

Each piece of garment is delivered with our OCCGuarantee® labels, which include full information about cotton traceability, environmental impact and LCA (Life Cycle Assessment)
