Fabrics dossier

What is an OCCGuarantee[®] fabric?

Our OCCGuarantee[®] fabrics are 100% organic and regenerative cotton fabrics, free from chemicals and toxins, and entirely manufactured in Europe (between Spain and Portugal) by fabric manufacturers specifically chosen for the high quality of their production processes.

These manufacturers are strategic partners who share our values and have signed a strict code of conduct **to ensure ethical and non-harmful production processes for both people and the planet**. Our entire basic line of fabrics is crafted and delivered in the original natural colours of cotton fibres, just as they naturally occur from the seed. **No dyes or additional harmful chemical processes are used, reflecting the way cotton was cultivated and woven in ancient times.**

We offer our basic line of fabrics in up to 9 different natural shades, ranging from pure white to dark brown, including cream and green tones. If preferred, we can dye or print our fabrics in any colour, always using natural dyes without chemical processes or toxic products.

We manufacture fabrics with three types of high-quality cotton, all sourced from fair trade agricultural projects in Brazil, Egypt, and Turkey. These cottons are 100% organic and regenerative, and we use them to create both our basic Knit fabrics and any type of Knit and Woven fabrics on demand.

- OCCRegenerative[®] Brazil fabrics
- OCCByodynamic[®] Egypt fabrics
- OCCRegenerative[®] Turkey fabrics

OCC Regenerative[®] Brazil fabrics

(Ref. OCCR-BR-)

Fabrics made from our Brazilian Naturally Colorgrown cotton from the seed, a cotton of different local varieties that grows naturally in different shades of colours, such as the varieties “Branco Aroeira” and “Branco Mocó” (ecru and ivory shades), the “BRS Rubi” (reddish-brown colour), or the “BRS Verde” (pale green colour). Combining fibres from these 3 colours, we produce yarn in up to 6 different shades of browns, greens and ecru.

Our entire basic line of naturally coloured cotton fabrics is available in any of these shades, **and they are crafted with compacted and combed cotton yarns of count Ne 30s spun by our partner Spoerry 1866**. On demand, we can manufacture any type of Knit and Woven fabric crafted with a wide range of yarn counts.

OCCByodinamic®

Egypt fabrics

(Ref. OCCB-EG-)

Fabrics made from **Egyptian Pima cotton of different Giza varieties, the finest cotton in the world, with silky and extra-long staple fibres**. Available in cream shades (from the Giza 86 or Giza 90 varieties) or natural white shades (from the Giza 86 or Giza 92 varieties).

With these cotton varieties, we create fabrics in natural cream tones and in the purest natural white possible, without the need for highly polluting and toxic bleaching chemical processes. Our basic line of Egyptian cotton fabrics **is crafted with compacted and combed cotton yarns of Ne 40 count**. Upon request, we can manufacture any type of knit and woven fabric using compacted and combed cotton yarns with yarn counts ranging from Ne 14 to 120.

OCCRegenerative® Turkey fabrics

(Ref. OCCR-TK-)

Fabrics made from **Turkish Aegean cotton**, considered one of the best varieties of Upland cotton in the world due to its long staple fibres, natural shine, and softness, high homogeneity, and bonding with minimal yellowing. Our entire basic line of Aegean Pima cotton fabrics is **crafted with compacted and combed cotton yarns of gauge 30** and is offered in the natural ecru colour of the cotton fibres. On demand, we can manufacture any type of knit and woven fabric using compacted and combed cotton yarns with counts Ne 30 and 40.

All our fabrics are made of 100% organic and regenerative cotton, except for some references that include a bit of elastane, necessary for the correct use of the fabric in the garment.

Additionally to the fabrics of our three types of organic and regenerative cotton, **we also offer fabrics made from 100% non-regenerative organic cotton, and 100% recycled organic cotton:**

— OCCGuarantee®
Fabrics Essential

(Ref. OCCGE-)

Fabrics **manufactured with 100% organic cotton from Turkish origin**. Spun under the quality requirements of the Global Organic Textile Standards (GOTS) in Turkey and woven in Barcelona (Spain) and Portugal. They are available in a natural cream colour.

— OCCGuarantee® Fabrics
Recycle program

(Ref. OCCGRP-)

Flat fabrics **made with 50% organic cotton from Brazilian origin, naturally coloured + 50% Tencel Refibra®**. Spun and woven in Barcelona (Spain). They are available in light natural brown colours.

Discover the captivating natural colour palette of our OCCGuarantee® fabrics.

- Immerse yourself in the authentic beauty as **our fabrics are expertly fashioned with yarns that preserve the original**, untouched shades of each unique cotton variety.
- Experience the subtle, yet striking, natural tones woven into our fabrics, achieved by using yarns from **a single cotton variety or a fusion of different cotton strains. Elevate your style with the essence of nature in every yarn.**

Finest organic and
regenerative cottons
for a better world

What if none of our references meets your requirements?

At Organic Cotton Colours, we can reproduce any knit or woven organic cotton fabric based on a physical sample or technical specifications. Below, we outline the minimum production quantities for each type of fabric:

- **Knitted fabrics:** 100 kg (Depending on the fabric weight, approximately 150-350 meters).
- **Knitted and woven fabrics:** According to each project.
- **Thick, medium, and towel woven fabrics:** 500 meters per reference.
- **Fine woven fabrics:** 2000 meters per reference.

→ These quantities may vary depending on the desired weight, width, and structure. The project will be assessed, and a tailored minimum production will be offered in each case.

Do you need a custom fabric?

Dyeing Process

We can dye any fabric with **GOTS certified inks** based on a Pantone TPX or TCX shade. The minimum production for fabric dyeing is:

- **Knitted fabrics:** 120 meters per fabric and colour.
- **Knitted and woven fabrics:** According to the project.
- **Woven fabrics, thick, medium, and towel:** 200 meters per fabric and colour.
- **Fine woven fabrics:** 200 meters per fabric and colour.

Colour Sample (lap dip)

For producing a colour sample in fabric, we require the code for the shade according to Pantone TPX or TCX.

The cost of the colour sample is €40 per colour.

- If the production is confirmed, we will refund 100% of the colour sample cost.

Printing process

We print **any fabric** according to the provided design using **GOTS certified dyes**. We offer two types of printing services:

All-over Screen Printing

We can print fabrics with a width ranging from **135cm to 200cm**. The minimum production is 200 meters per fabric and print.

Digital All-over Printing

The minimum production is **120 meters** per fabric and design, and we can print up to **200cm** in width without colour limitations.

Since the technique requires a semi-bleaching of the fabric with a minimum quantity of 50 linear meters, to produce the production sample, the corresponding amount for 20 meters of already printed fabric must be paid.

All-over Screen Printing: Technique and Support

Screen

- In this case, we can combine up to 5 colours.
- The cost of each colour screen is an additional €200 to the price of the printed fabric.

Cylinder

- In this case, we can combine up to 8 colours.
- The cost of each cylinder is €300 per added colour to the price of the printed fabric.
- Price for a printed sample with a cylinder or screen = €80.
- If production is confirmed, the entire cost will be refunded in the final invoice.

Do you need to develop a specific print?

We offer the creation of unique patterns and rapports, as well as a wide range of pre-existing designs ready for use. Feel free to inquire about additional manufacturing services we provide.

Digital Print or Screen Printing Sample (Strike Off)

For the production of print samples, we require the design file to be submitted in vector format, .ai or .eps, traced, with final production measurements and true colours.

In the case of **all-over prints** (spanning the entire width of the fabric), it's essential to combine the design so that the rapport can seamlessly repeat across the fabric, ensuring a perfect fit.

Cost of print sample (strike off) and/or positional screen printing = From €50 to €80.

Depending on the design, print dimensions, and the number of colours, the cost of each screen will be approximately: €30-€50.

→ If production is confirmed, we will refund 100% of the sample cost.

Why isn't the colour of our OCCRegenerative® - Brazil naturally coloured cotton fabrics always the same?

Our OCCRegenerative® Brazil fabrics (Ref. OCCR-BR) embody the essence of **100% organic and regenerative cotton, showcasing the natural hues in which the cotton fibres emerge from the seed: ecru, green, and brown.** We abstain from applying chemical fixatives that would isolate the fabrics from natural elements. This ensures the cotton remains vibrant within the fabric, alive and responsive. **Through washing and exposure to sunlight, the fabric evolves.** Every wash, every sunbeam, influences the fabric's tone.

The natural ecru, green, and brown colours may undergo shifts, particularly in contact with water, darkening subtly. This phenomenon is more pronounced in the green and brown tones but is also observed in the ecru hue. When exposed to light, the colours may significantly lighten. When hanging the garments to dry, we recommend choosing a spot where the garment isn't directly exposed to sunlight, preserving the organic, dynamic nature of our fabrics.

But why do the fabrics have different tones before washing or exposure to sunlight?

This occurs because not all the cotton varieties we harvest have the same tone. Additionally, exposure to light and rainwater, along with the natural nourishment from the soil in which they are cultivated, will modify the shade of our OCCRegenerative® Brazil organic cotton.

Another factor that may cause the fabrics not to maintain a consistent tone is that, once spun, we blend naturally coloured brown or green with raw fibre to achieve a longer fibre and better fabric quality. Depending on the blend (for example, 50% brown + 50% raw - 30% brown + 70% raw), the final tone of the fabric will also vary.

Do you have doubts about the actual tone of one of our fabrics?

In our online store, you can find photographs of all of them where we aim to be respectful of the true tone of the fabric. If you still have uncertainties, feel free to request a sample for verification.

Do you want to communicate to your customers that your garments are crafted with the finest cotton for both people and the planet?

With the purchase of our fabrics, **we include complimentary OCCGuarantee® labels**, allowing you to provide your customers with information about the cotton's origin, health benefits, traceability, and the positive environmental and socio-economic impact associated with each garment made with **OCCGuarantee®** cotton.

-
- We offer **free and unlimited space** (for your collection) on our website to enhance the visibility of your brand.
 - **We showcase your project** to our followers as an **OCCGuarantee® Brand with Soul** on our blog and social media platforms. Elevate your brand with a story that goes beyond fashion.

Our OCCGuarantee® labels incorporate the following information:

- The traceability guarantee seal “**OCCGuarantee® FROM SEED TO GARMENT.**”
- The brand of the cotton type used in the fabric: **OCCRegenerative® Brazil, OCCRegenerative® Turkey, or OCCByodynamic® Egypt.**
- The statement “**100% organic and regenerative cotton.**”
- **A QR code** to access our informational capsules with audio visual material illustrating:
- **The type of cotton** used in the garment and a description of the social project in organic and regenerative agriculture from which it originates.
 - **Indicators of positive socio-economic and environmental** impact generated by the customer’s purchase of the garment.
 - **Health benefits for the user’s skin** by using chemical-free and non-toxic cotton fabrics.
 - **The description of the cotton’s custody chain** in its transformation process into fabric, from seed planting to final fabric assembly, with the guarantee that all actors and suppliers in the transformation chain are **GOTS and BCorp certified.**

Do you need 100% organic and sustainable labels for your brand?

- To provide you with a comprehensive solution in marketing garments and collections crafted with our fabrics, we've developed ribbons and cords made from our organic cotton.
- Additionally, we produce printed textile labels using our organic cotton ribbon. These labels are printed in Barcelona with vegetable dyes.
- The minimum production for brand labels per design is 1 roll of 100 meters of ribbon, yielding approximately 1300 to 1600 labels, depending on the model.
- We offer three ribbon widths in natural raw colour: 15mm, 20mm, and 30mm, and two widths in natural brown colour: 20mm and 30mm.
- – Based on the label design, we will provide you with the production price per label and the associated minimum production quantity. Labels are delivered cut and folded to your specifications.
- The screen printing cost ranges between €40 and €80, depending on the design.

A bit of additional information

The shrinkage value varies between 4% and 7% in the first wash, depending on each fabric. We recommend **washing fabrics with cold water** or at a maximum temperature of 30°C and using natural detergents.

For orders exceeding 200 meters per reference, you can request a specific production price. **We can reproduce any knit or flat fabric with OCCGuarantee® organic cotton.**

For more information, you can contact us at:

- info@organiccottoncolours.com
- +34 972 835 995

All our **products are subject to market availability**. Prices are valid except for typographical errors or significant changes in price.

Organic Cotton Colours is a certified GOTS (CU 832882) company for all cotton processing units. Therefore, we can create any fabric or final cotton garment under this 100% organic cotton seal. If you need to obtain the **GOTS Transaction Certificate** for the fabrics we have available in stock, you must request it in advance. This process incurs additional costs.

All references are available for online ordering at **<https://shop.organiccottoncolours.eco/en/shop>**.

In our **online store**, apart from fabrics currently in **stock**, you can find **surplus** from occasional productions that are not continued, offered at reduced prices, as well as pre-sales of **new references** available soon.

A high-angle photograph of a man and a woman lying on their stomachs on a white blanket outdoors. The man, on the left, is wearing a white long-sleeved shirt and white trousers, and is holding an open book. The woman, on the right, is also wearing white clothing and has her hair down. An orange sits on the blanket between them. The scene is brightly lit, suggesting a sunny day.
